Subject RE: 80 Wampus Lane, Milford, CT

Thanks. The potential exceedances of the proposed SVVC are probably the most important to address on Lot 1 at this time. Many of the soil related issues referenced in the letter have been addressed I believe, and it is just a matter of discussing them and possibly better documenting the RSR compliance strategy(s). However, for reasons we have discussed in the past, I am not sure I/ERM will be involved moving forward.

Gene, because this is a DEP-lead Site, I don't believe there is any requirement for me to provide documentation of a change in LEP, but as a courtesy, I wanted to let you know that it is a possibility due to reasons we have discussed in the past.

Jim
